

Soundtrack Your Brand Integration - FIXED

The Problem

Your Soundtrack Your Brand integration was getting **404 Not Found** errors because:

1.  Wrong authentication method (Bearer token instead of Basic)
2.  Trying to use REST endpoints that don't exist
3.  No GraphQL implementation

The Solution

-  **Fixed Authentication:** Changed to Basic Authentication (correct method)
-  **Implemented GraphQL:** Using official Soundtrack API patterns
-  **Added Delete Feature:** Can now remove API token configuration
-  **Better UX:** Clear terminology, helpful links, better error messages

What You Can Do Now

1. Configure Soundtrack

/soundtrack → Enter API Token → Save

2. Delete Configuration (NEW!)

/soundtrack → Click Delete → Confirm → Done

3. Manage Sound Zones

/soundtrack → Toggle Visibility → Set Order

4. Test Connection

/soundtrack → Test API Connection → View Results

How to Get API Token

1. Visit: <https://api.soundtrackyourbrand.com/v2/docs>
2. Click "Request API Access"
3. Fill form (use account: "Graystone Ale House")
4. Wait for approval email
5. Copy your Base64-encoded token
6. Paste into `/soundtrack` page

Files Changed

File	What Changed
src/lib/soundtrack-your-brand.ts	Complete rewrite using GraphQL
src/app/api/soundtrack/config/route.ts	Added DELETE endpoint
src/components/SoundtrackConfiguration.tsx	Delete button + UI improvements

Authentication Fix

Before (Wrong) ❌

```
headers: {  
  'Authorization': `Bearer ${token}`  
}
```

After (Correct) ✅

```
headers: {  
  'Authorization': `Basic ${token}`  
}
```

Test It

```
# 1. Pull latest changes  
cd ~/Sports-Bar-TV-Controller  
git pull  
  
# 2. Visit configuration page  
# Open browser to: http://localhost:3000/soundtrack  
  
# 3. Enter your API token and test
```

Status

- ✅ Changes committed to GitHub
- ✅ Authentication fixed
- ✅ GraphQL implemented
- ✅ Delete feature added
- ✅ Documentation updated
- ✅ Ready for testing

Need Help?

- **API Docs:** <https://api.soundtrackyourbrand.com/v2/docs>
- **Example App:** https://github.com/soundtrackyourbrand/soundtrack_api-example_app

- **Support:** api@soundtrackyourbrand.com
